

MITES Engineering Log- Jillian Bernotaitis			
DATE	DAILY GOAL	DAILY PROGRESS	ARE YOU SATISFIED WITH WHAT YOU DID TODAY. WHY OR WHY NOT
3/25/2015	Pick an object to draw and begin to draw it in CAD. Decide if I will hand draft the object if I finish the drawing in CAD.	I picked a shifter fork (figure 8.47 on page 266 in the drafting book). I started to draw it in CAD.	Yes, because it is only the first day I have worked on the object, and I have a great start on it.
3/30/2015	Finish drawing the 3 views of the object.	I have almost all three drawings completed but am having a hard time with the angled arm.	Yes, because I barely had a front view and now I am close to dimensioning the object.
3/31/2015	Finish drawing the 3 views of the object, and start dimensioning them.	I finished all three drawings and almost all the dimensioning. I might have missed something, and I am also worried about the angled arm not looking right on the top and right side views. There might be some special view I need to use for this object.	Yes, because I finished the right side view, and almost finished the dimensioning.
4/1/2015	Finish dimensioning the object and see if I need to add anything.	I finished all three drawings and all the dimensioning. I am still worried about the angled arm not looking right on the top and right side views. I believe that I need to do a special view for this object. I also turned in a check-set.	Yes, because I finished all the views, and all the dimensioning. I also did the check-set that was required to turn in. I still am worried about the top and right side views looking odd.
4/13/2015	Find out what an "Auxiliary View" and draw one of my object.	I read and learned about auxiliary views and now have a better idea on what I will be drawing.	Yes, because I learned about auxiliary views and know how to make my drawing better. However I did not have enough time to draw the auxiliary for my drawing.
4/14/2015	Draw a auxiliary view of my drawing and maybe dimension it.	I drew an auxiliary view of my drawing and started to edit my dimensioning.	Yes, because I learned and drew the auxiliary view of my drawing and are coming close to finishing. I am still unsure where certain dimensions should go though and if I keep all my drawings.
4/15/2015	Fix any mistakes on my other drawings and dimension them.	I fixed all the mistakes in my other views and fixed their dimensions. I also turned in a check-set.	Yes, because I fixed all my mistakes and turned in a check-set.
4/17/2015	Fix any mistakes on my other drawings from my check-set.	I fixed all the mistakes from my check-set, but I am have a little trouble with the "arm" in the top view.	Yes, because I fixed everything from the check-set, and I am almost completely done. However, I am worried about the top view.

4/20/2015	Fix the top view of my drawing and see if anything else is needed to be done to it.	I fixed the top view and some other little changes. I also turned in a check-set today.	Yes, because I fixed the top view which I was confused on and I feel close to being completely done with the drawing.
4/22/2015	Fix any mistakes from the check-set and add anything else needed.	I fixed all my mistakes from the check-set and prepared it for plotting.	Yes, because I fixed everything from the check-set, and I am almost completely done.
4/23/2015	See if there is anything else I need to fix in the drawing and maybe plot the drawing.	I fixed any mistakes I missed and plotted. I fixed the dimensioning sizes afterward.	Yes, because I fixed everything from the check-set and plotted it at a 1:1 scale.
4/24/2015	See if there is anything I missed and fix it, and turn in a check-set. Maybe plot it as a final draft.	I turned in my check-set and fixed one last thing. I plotted it which is hopefully the final drawing.	Yes, because I fixed the last thing I needed and plotted a final drawing. I believe I am almost completely done with the MITES project.
4/27/2015	I will glue my final drawing to poster board and make a boader around it.	I glued my final drawing to a poster board and cut it to size.	Yes, because I accomplished all that I wanted. I am a little worried because my board is not straight.
4/28/2015	I will see if I need to finish any thing with my poster.	There was nothing else to do so I did work from other clases.	Yes, because I finished my whole MITES project and can work on other work now.
